CICERONE has received funding from the European Union’s Horizon 2020 Research and Innovation Program under Grant Agreement 820707.
OPTIMISING CIRCULAR ECONOMY PROGRAMMING IN EUROPE

CICERONE brings together key stakeholders including programme owners, researchers and businesses to build a platform for efficient circular economy.
The European Commission's package in Circular Economy has enabled an exposition of initiatives in Europe. However, the outcomes of research and innovation are not fully exploited and promoted at European level.
Circular businesses and projects are fragmented, making international synergies difficult. And it has become more and more apparent that joint programming is a must to optimise impact.
CICERONE IS DEVELOPING THIS STRATEGIC COORDINATION OF OBJECTIVES AND PROGRAMMING OF REGIONAL, NATIONAL AND EUROPEAN FUNDING PROGRAMMES
STATE OF THE ART
Assessing and benchmarking the current performance of circular economy research & innovation funding in Europe.

STRATEGY
Establishing an efficient and inclusive mechanism to jointly define and prioritise circular economy research & innovation priorities at European scale.

PLATFORM
Building and testing a lasting organisation and pathways to reach the desired impact, translated into a joint programming platform for programme owners.
CICERONE was designed and is being implemented by 24 partners from a variety of organisations across Europe - thus providing a well-rounded, holistic pathway to advance the EU’s switch to a circular economy.
