INTRODUCTION

A total of four newsletters and videos are planned to be released to inform MSP-REFRAM's partners and stakeholders on the latest news and activities carried out in the project. They are released in the month following each workshop and after the final conference, in order to provide a summary of the discussions that were held at these events.

MSP-REFRAM organised its second workshop in Brussels from 27-29 September 2016. Building on the results and feedback collected during the first workshop, it opened discussions on potential innovation pathways that optimise the balance between resource availability and usage.

The event gathered 50 participants, including 15 experts, who exchanged on potential substitutions and assess innovative product/service design and business models that may bring change in the current value chain.

During two days, partners in the project presented their work on tungsten, rhenium, niobium, tantalum and molybdenum and collected feedback from the members of the External Experts Committee.

NEWSLETTER

The second newsletter was distributed on 8 November 2016 to nearly 579 persons.

Access e-newsletter here: <http://eepurl.com/cks8v5>

VIDEO

The second video was produced and released on 16 October 2016. It was also embedded into the second newsletter.
