

PROMOTING INNOVATION IN MINERAL PROCESSING AND EXTRACTIVE METALLURGY FOR THE MINING AND RECYCLING OF RAW MATERIALS

PROMETIA aims to make raw materials accessible for European industries and citizens, contributing to a low-carbon and more circular economy

A UNIQUE NETWORK

PROMETIA aims to **strengthen Europe's technical skills and expertise in raw materials processing**, and foster industrial and economic development through collaboration.

The association addresses the challenge of **securing Europe's supply of raw materials** at affordable prices and supports the development of innovative, environmentally friendly and socially acceptable technological solutions that optimise and improve the extraction of raw materials and waste treatment.

With circular economy at the heart of its vision, PROMETIA also **supports the recycling, reuse and recovery of raw materials** from primary and secondary resources.

A GROWING COMMUNITY

Established in **2014**, PROMETIA gathers **members** from **industry, research organisations, academia and SMEs**. Together, they cover all of the skills and technology readiness levels from the mineral processing to the extractive hydro- and pyrometallurgy fields.
