

Supporting Innovation For Responsible Metals & Materials Production

PROMETIA is an international non-profit association that promotes innovation and sustainability in the fields of mineral processing, extractive metallurgy and recycling for metals and materials production.

The association's mission is to facilitate access to critical and strategic raw materials for European industry and citizens.

One network, 40+ members and a shared vision for responsible raw material supply in Europe.

PROMETIA'S FIVE KEY ACTIONS

1

Access to cutting-edge knowledge

Promote access to the latest scientific knowledge through collaborations and the annual Scientific Seminar.

2

Partner for innovation & industrialisation

Provide a network of independent European pilot plants with complete solutions for raw material processing specialised in mineral and metallurgical processes (Metnet).

3

Networking Hub for new ideas & projects

Facilitate the exchange of ideas and project development, especially for European projects, through dedicated seminars and webinars.

4

Training of future experts in the sector

Foster the next generation through annual Tech Tours offering young researchers networking opportunities, hands-on experience and insights into the sector.

5

Advocacy for responsible production

Accompanying the European Commission with expertise for responsible production and representing the vision of our members at EU level.
