

PROMETIA

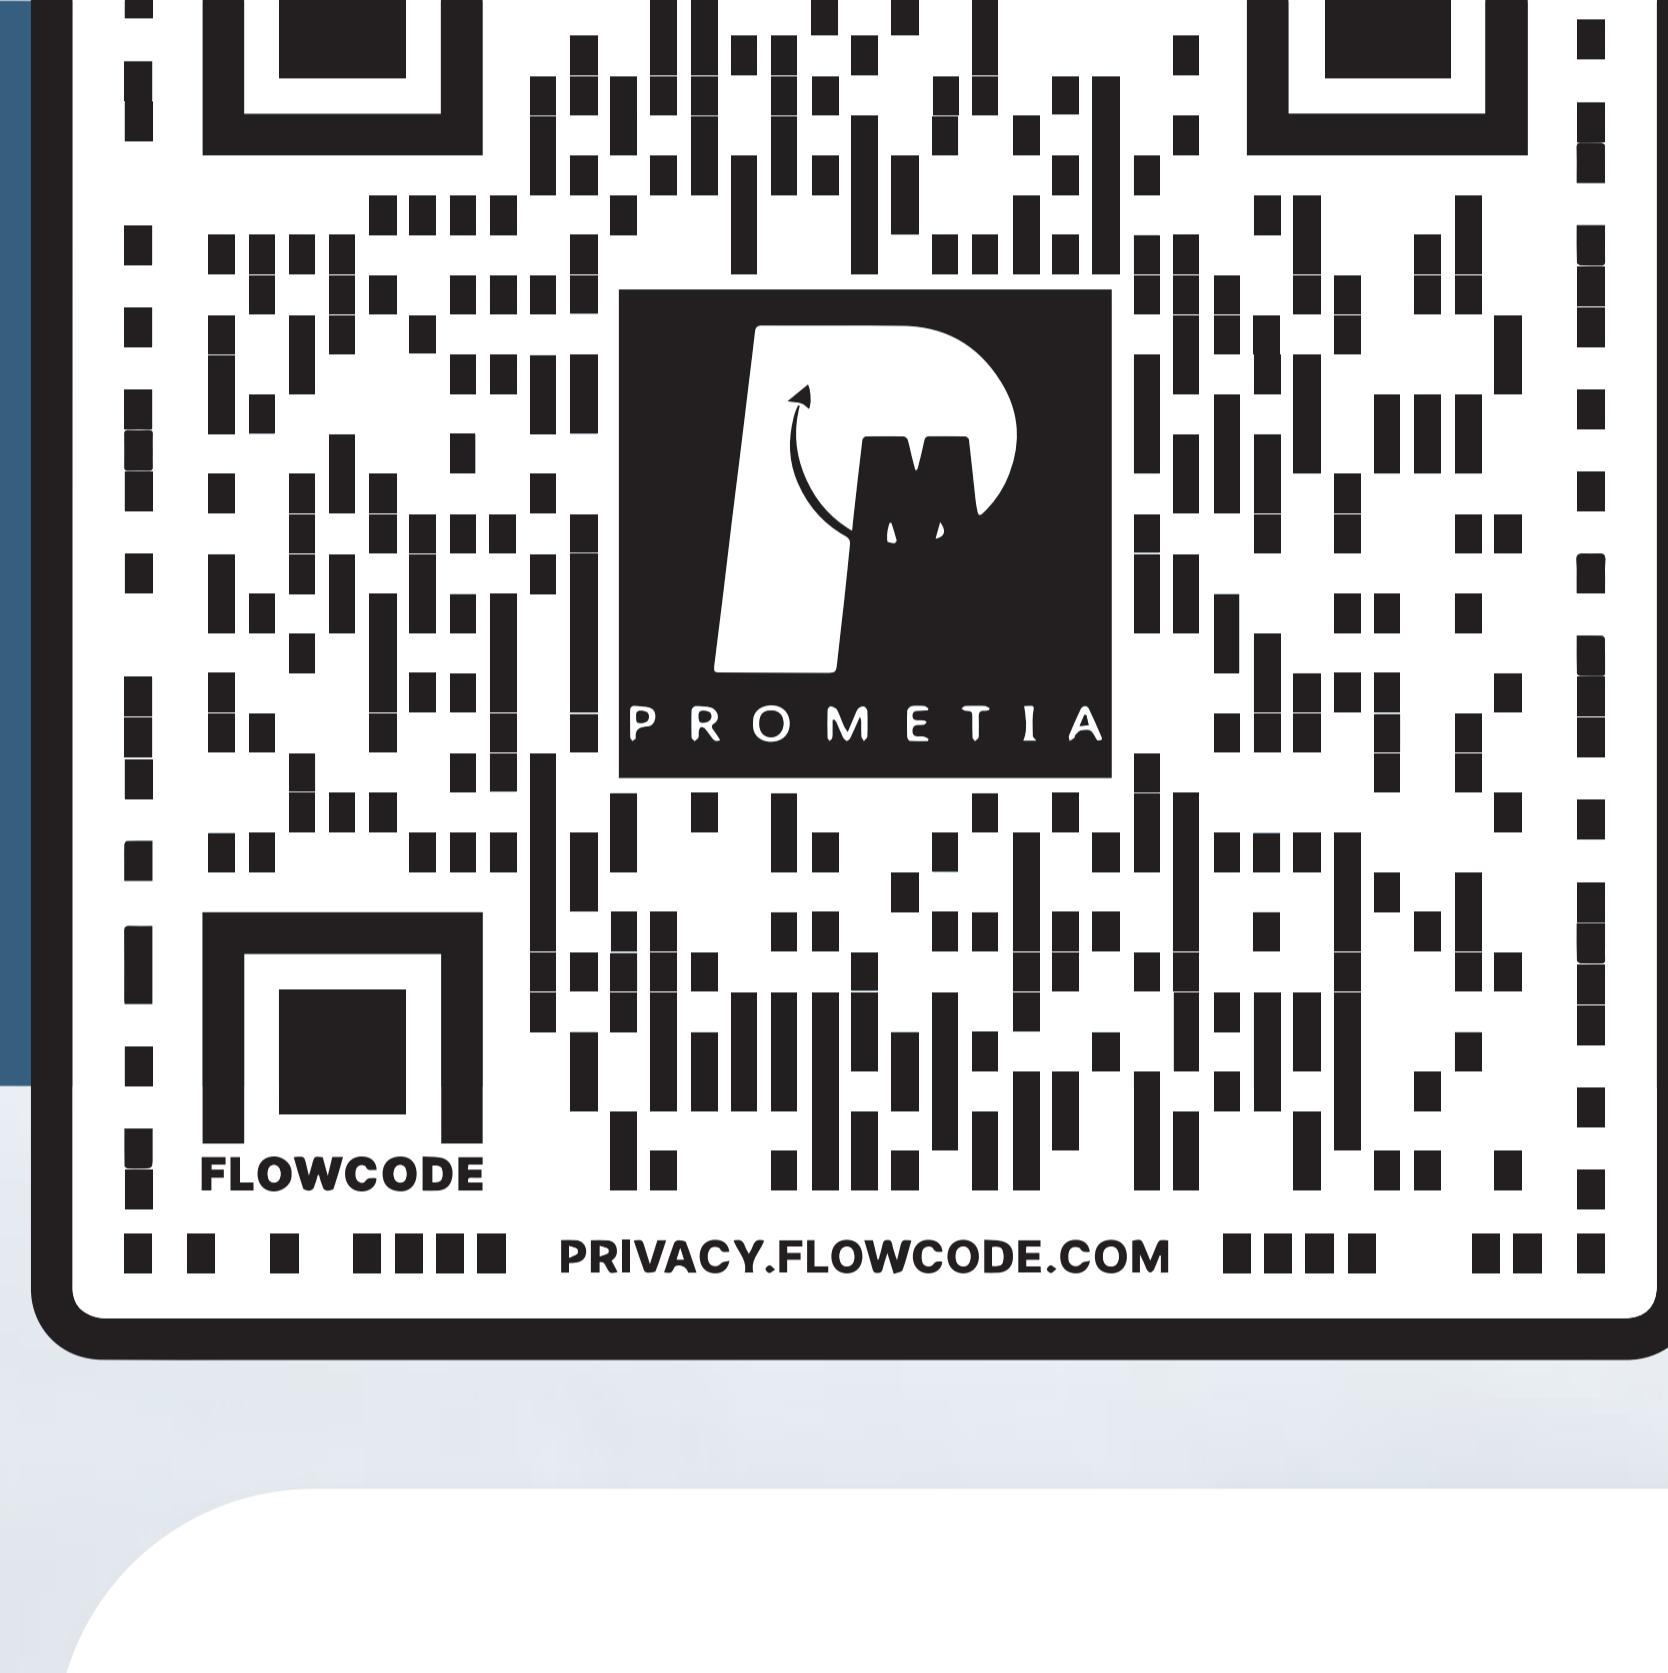

PROMETIA Tech Tour

Empowering Tomorrow's Industry Experts

- **Join a selected expert group:** As a member, get exclusive access to the Tech Tour dedicated to PhD students, postdocs, young engineers & researchers.
- **Explore top facilities:** Visit Europe's leading metallurgy and mineral processing sites.
- **Build your network:** Connect with industry leaders & like-minded peers, forming lasting professional relationships.
- **Accelerate your career:** Acquire knowledge, ideas & community support.

Spread the word about the **PROMETIA Tech Tour** in your network, or join us as a member and take part in the next edition, to help us advance the future of metallurgy and materials recycling in Europe.

Testimonies from our PROMETIA Tech Tours

"The Tech Tour gave us the opportunity to visit production sites and laboratories involved in all stages of raw material production: mining, mineral processing, pyro/hydrometallurgy and recycling. It was also a great way to meet people working in the metallurgy field, both in the academic sector and in industry."

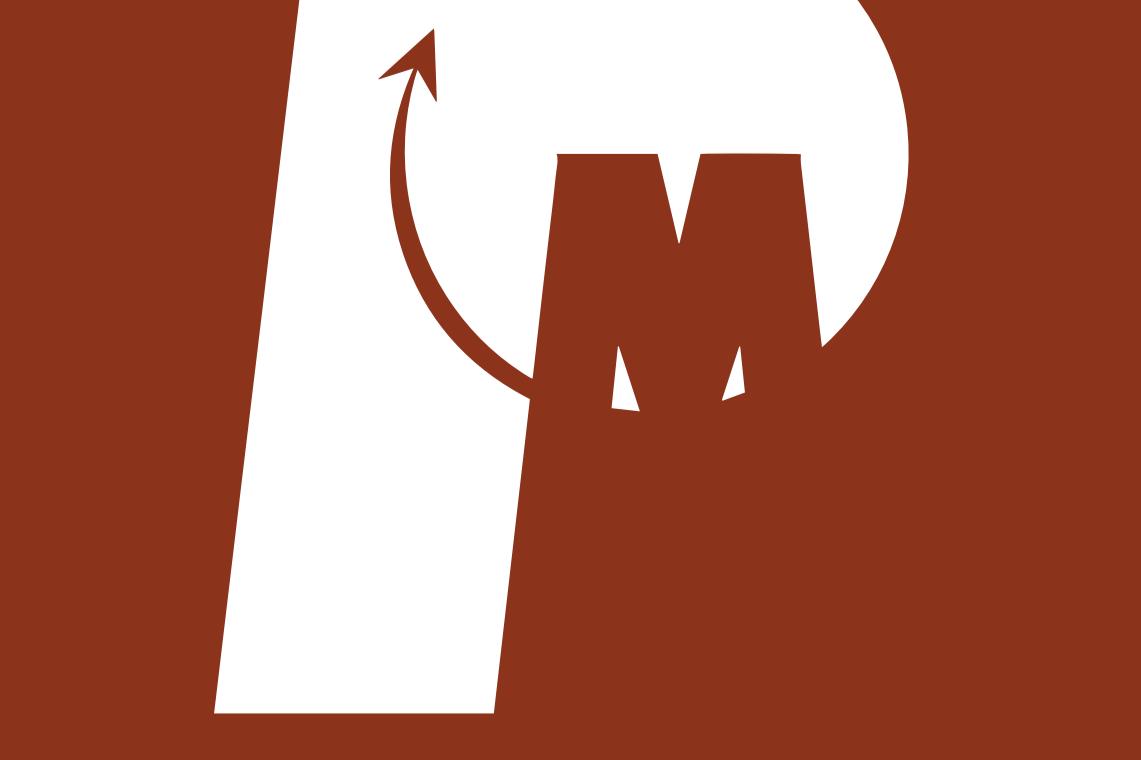

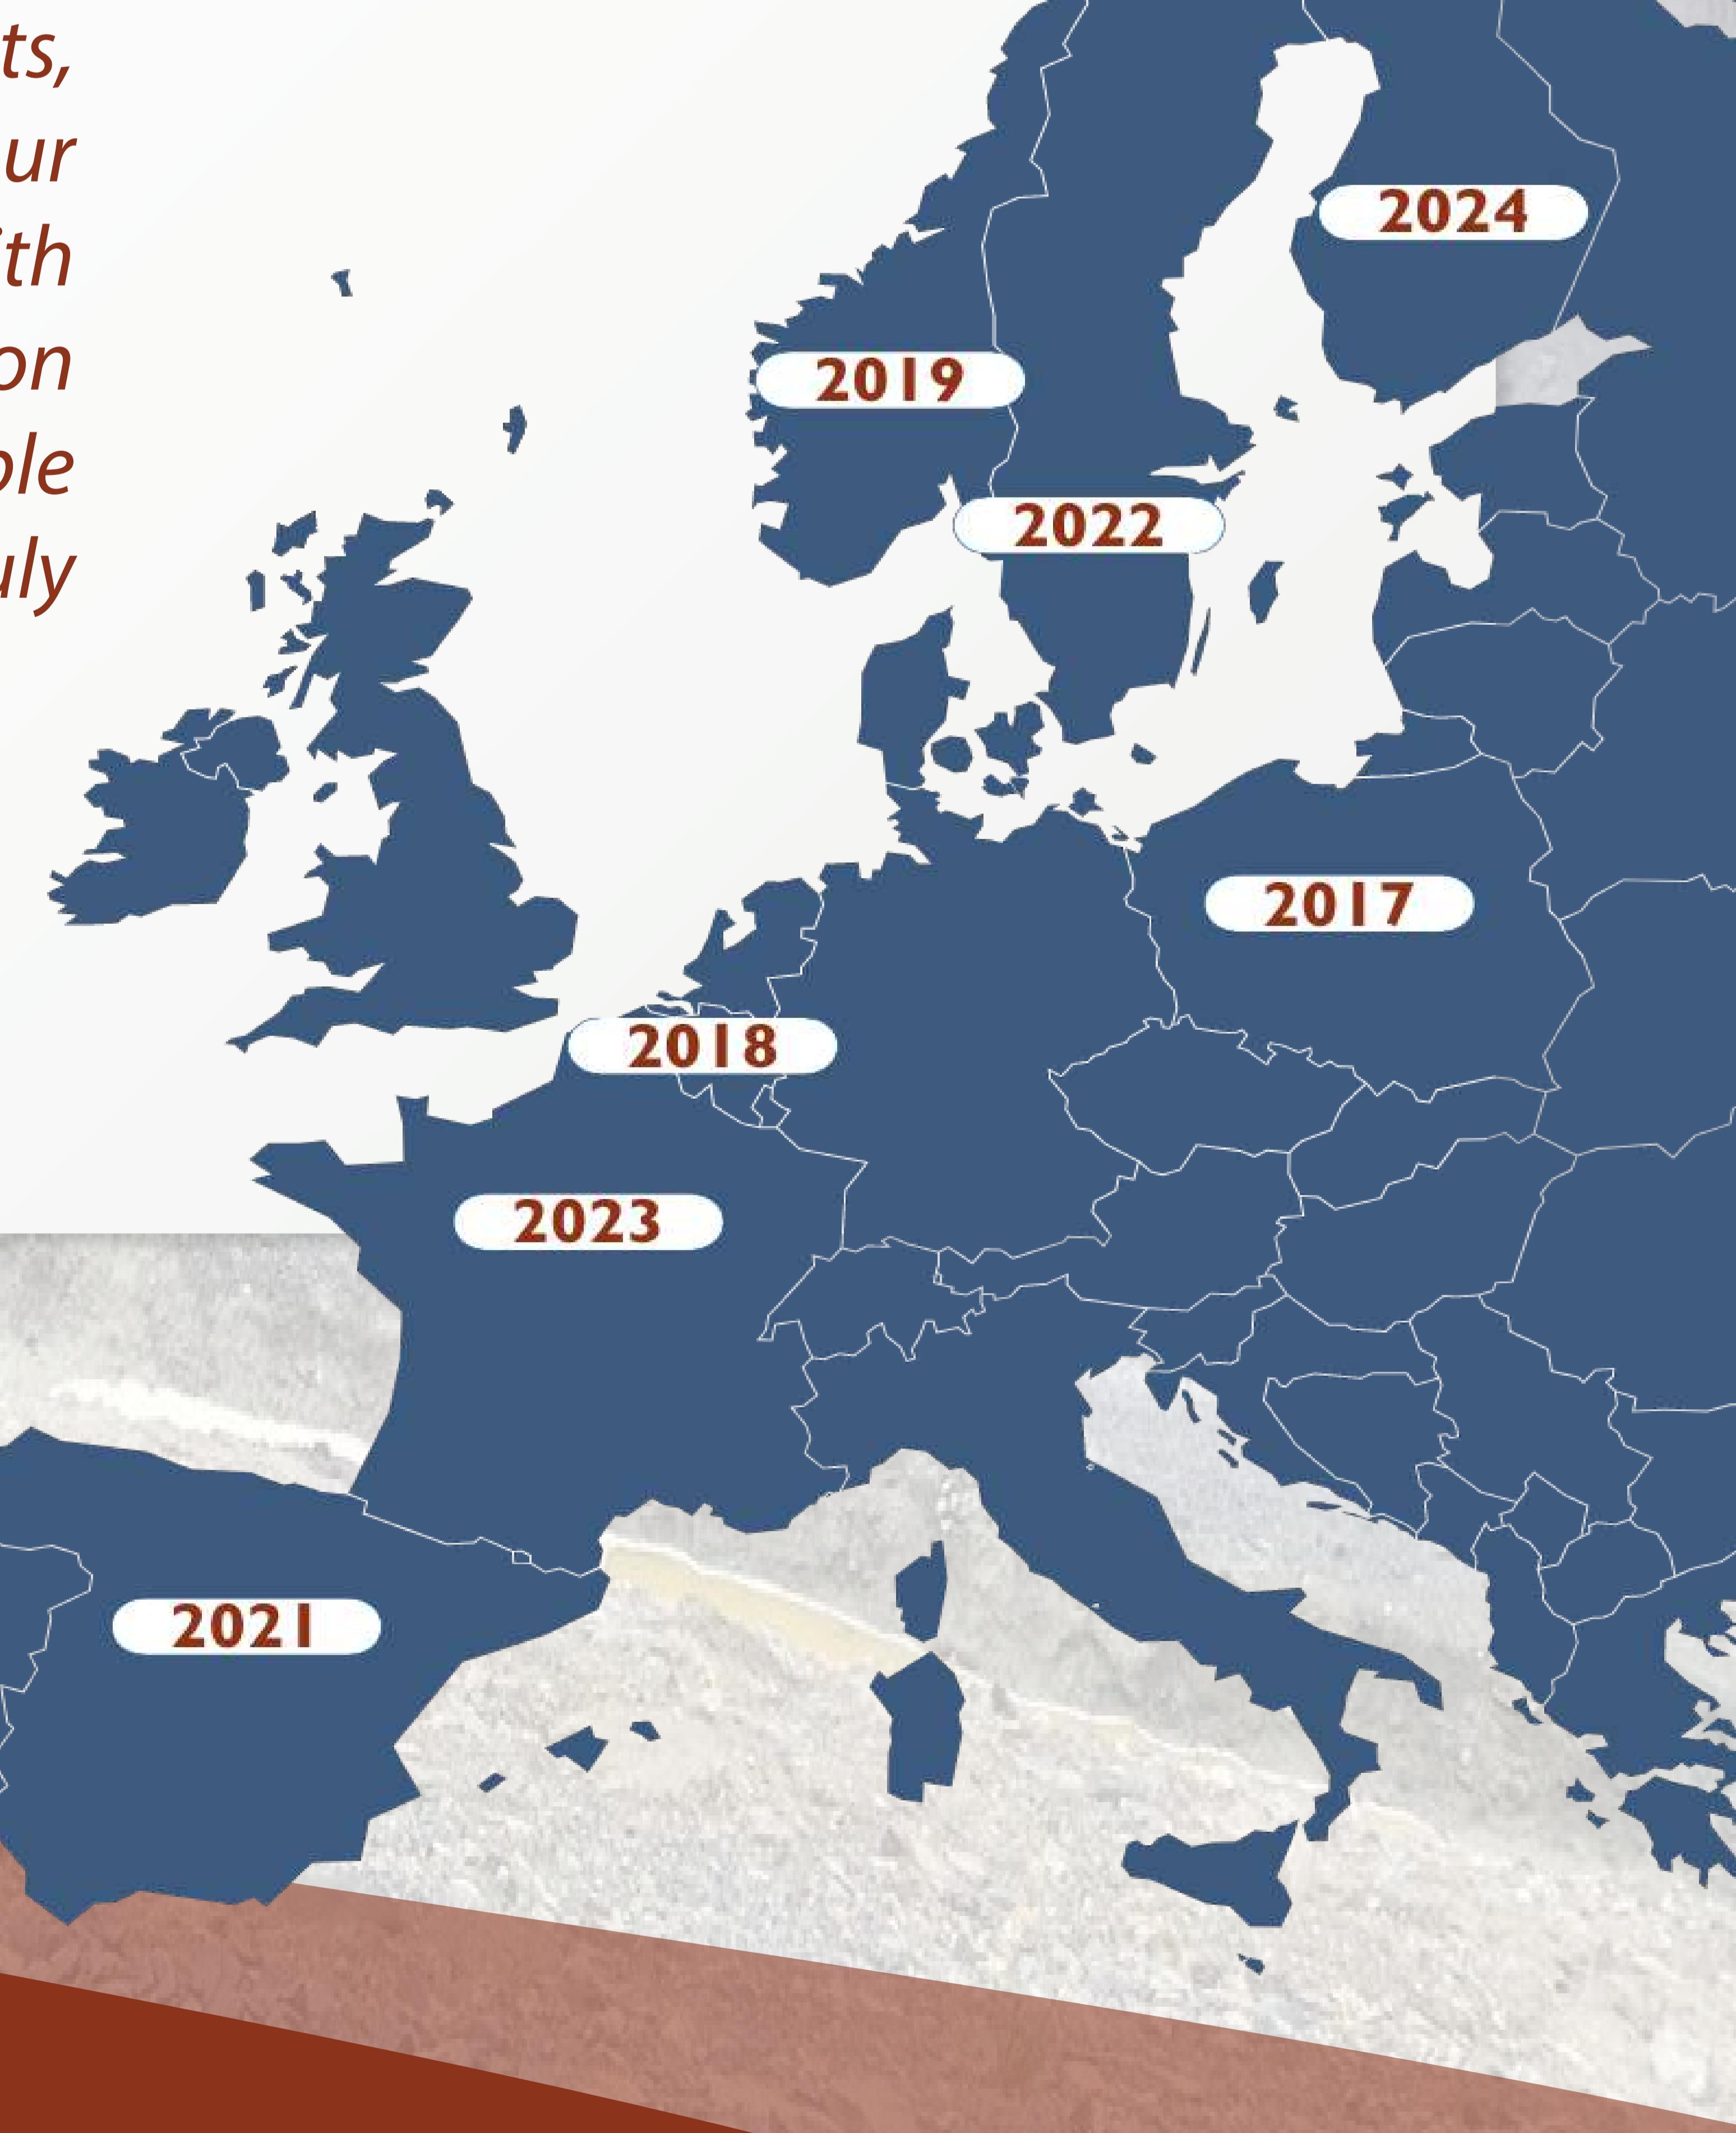

Tech Tour 2022, Sweden, Maud Herbelin, Eramet

"I would strongly advise any young scientist interested in minerals resources to take part in PROMETIA's Tech Tour. It gave me the impression of getting back to the heart of what makes me do science: the pleasure of discovery, the desire to understand and the joy of sharing."

Tech Tour 2023, France, Clément Laskar, Laboratoire de Génie Chimique

"Beyond the technical and industrial insights, one of the most rewarding aspects of the tour was the opportunity to meet and network with fellow young researchers. The shared passion and commitment to advancing sustainable practices in our respective fields were truly motivating."

Tech Tour 2024, Finland,
Hannah Weber & Fabian Kadisch, TU Delft
